

Mack Sennett set up his second studio in the San Fernando Valley in 1926 and the area that developed around his property became known as Studio City. In the last 90 years, the city has become a major film and production hub, serving as the location for well-known companies like Universal Studios and Dreamworks, as well as an incubation center for burgeoning start-ups.

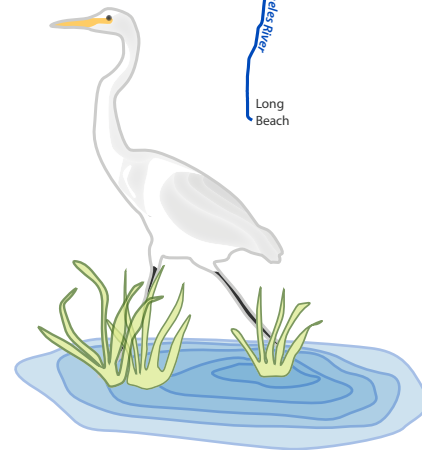

Tujunga Wash was split into three separate branches during the channelization. The wash near the 101 is known today as the Central Branch. The eastern branch travels south following Withnall Highway and daylight near Johnny Carson Park.

The **Juan Bautista de Anza National Historic Trail** corridor follows the LA River and commemorates the 1775-1776 Spanish expedition to settle Alta California. The Los Angeles River Greenway is a certified segment of the recreation retracement trail. anzahistorictrail.org nps.gov/juba

VALLEYHEART RIVER TRAIL
 trail starts at Ethel Ave, head towards Mason Ave. Walk or bike the path and observe the drought tolerant plants and migratory bird species.

IN STUDIO CITY: The trail starts at Ethel Ave, head towards Mason Ave. Walk or bike the path and observe the drought tolerant plants and migratory bird species.

JOHNNY CARSON PARK: Visit the newly redone park near the Tujunga Wash Creek, a tributary to the Los Angeles River. For river access, head south for less than 1/4 mile on Bob Hope Street. Parking and trail entrances available. Turn right at the fork. Fernando valley stretch of the river still features great walking paths, bike trails, bird-watching, and kayaking, and in the future some important connections to our often underappreciated mountain spaces.

FoLAR.org

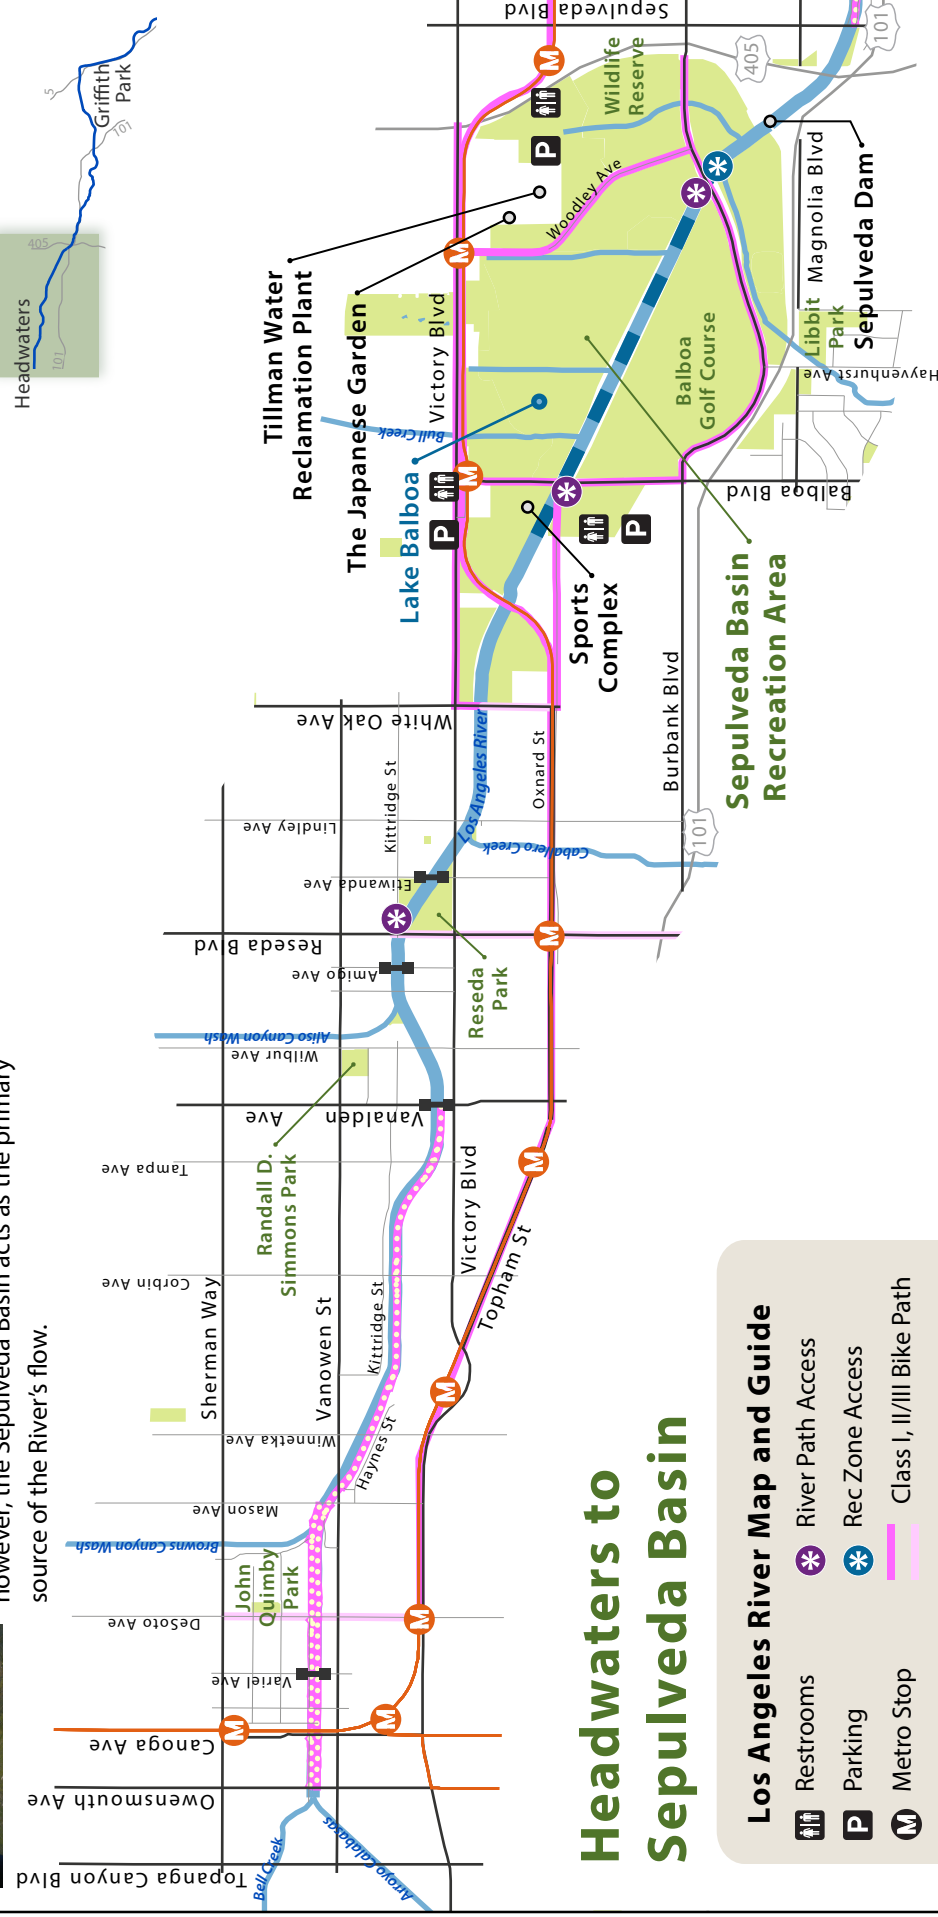

The Los Angeles River Watershed encompasses more than 10 tributaries, or smaller streams, which form the main stem of the L.A. River. The River historically begins at the confluence, or joining, of Bell Creek and the Arroyo Calabasas; however, the Sepulveda Basin acts as the primary source of the River's flow.

The Juan Bautista de Anza National Historic Trail corridor follows the LA River and commemorates the 1775-1776 Spanish expedition to settle Alta California. The Los Angeles River Greenway is a certified segment of the recreation retracement trail.

The Sepulveda Basin Recreation Area was originally designed as a flood control basin, and its 2000-acre expanse incorporates diverse elements, including a wildlife reserve that provides crucial habitat space; the Tillman Water Reclamation plan, which treats 40 million gallons of water per day; and Lake Balboa and The Japanese Garden, which are stunning backdrops for various recreational activities.

Ulysses S. Grant High School
Great Wall of Los Angeles

Lining the west bank of the Tujunga Flood Control Channel is one of LA's most spectacular displays of public art. Conceived by Judy Baca and SPARC-LA, the Great Wall of Los Angeles depicts the history of the ethnic peoples of California in celebration of the region's cultural diversity and vibrancy. This iconic mural is a must-see for lovers of history of art.

The LA River Bike Path provides a fun, safe way to experience the River. Although several stretches of the bike path are currently disconnected, collaborative efforts between organizations, FoLAR included, aim to improve the condition of the greenway as well as better connect the River's 51-mile length.
