

Cedars-Sinai Impact Report

April 2022

**FRIENDS OF THE
LA RIVER**

Cedars-Sinai

Together with our corporate sponsor Cedars-Sinai, we removed:

+750 lbs of trash

varying from cigarette butts, measuring tape, to discarded shopping carts and rugs.

Thank You Cedars-Sinai

We were happy to welcome Cedars-Sinai to our cleanup this week to celebrate Mother Earth. We're grateful for Cedars-Sinai's financial support of our cleanups and appreciate all of your efforts towards environmental stewardship. With your help, we could build an LA River that is climate resilient and equitably accessible to all Angelenos—accessibility that will allow us to bring more people to the River to experience the positive effects of nature engagement on well-being and mental health.

April 21st -24th

Pounds of Trash Collected

Number of Seedballs Made

BY THE NUMBERS

+1,178 lbs of trash removed from the LA River

Why Do We Charge For Corporate Cleanups?

The money we receive from your participation in these Earth Week CleanUps covers the dumpsters, port-a-potty, trash haul, permits, gloves, trash bags, staff time, and other associated costs. Once these costs are covered, if there are any excess funds, we put them directly toward our other programs, which move us toward environmental preservation and climate mitigation. Our goal is not only to preserve the environment but to make it more equitable and just.

We don't passively hope for an equitable and just environment; we intentionally pursue it. For example, while all students are welcomed into our program, we focus on Title 1 Schools so that the children at these schools who receive limited funding engage in STEM and place-based environmental education in similar ways to some of their more affluent counterparts. Fundraising allows us to offer our program free of charge for Title 1 Schools. This is the type of impact you're having by signing up for this cleanup. Your funds go beyond environmental conservation and civic engagement right now; it helps us ensure that we have environmental stewards tomorrow so that we can increase levels of community engagement with nature and elevate the association with improved health status.

Title I Schools are in communities where the majority of the families live at or below the federal poverty level.

THANK YOU TO OUR EARTH WEEK SPONSORS

Thank you for helping us:

Advocate

The importance of building a climate resilience water way by restoring

51 Miles of the LA River.

Restore

110 Acres

Of natural riparian biodiversity by removing invasive species

Protect

Urban riparian habitat home to over

1,200 species of wildlife.

Generate

Comments to public agencies on impactful environmental policy.

With 600 public comments made in 2021

Connect

3000 Title I students

A year to nature in an outdoor or virtual classroom experience on the banks of the LA River.
